Description:

All is lost. Evil will soon consume the DHaran Empire. Richard Rahl lies on his funeral bier. It is the end of everything. Except what isnt lost is Kahlan Amnell. Following an inner prompting beyond all reason, the last Confessor will wager everything on a final desperate gambit, and in so doing, she will change the world forever. Terry Goodkinds New York Times bestseller, Warheart, is the direct sequel to, and the conclusion of, the

story begun in *The Omen Machine*, *The Third Kingdom*, and *Severed Souls*.

I wish I could adequately express my love for this series with my profound disappointment that it was written by Terry Goodkind. These characters and this world are something special, but the flaws in the writing, the cheat of the ending, and the frustrating aspects cannot be ignored. (Please note: this review contains spoilers.) After all this time, Terry Goodkind finally concludes the *Sword of Truth* series with *Warheart*. I've reviewed each of the previous books, and most of my reviews have touched upon the same aspects to the point where I feel almost as repetitive as Goodkind: The writing is terrible and repetitive, badly in need of a good editor, the characters are stunningly unintelligent most of the time and speak in the rhythms of small children (or, at best, young teenagers), and the plot is filled with convenient rules and even more convenient exceptions to those rules whenever needed. Bizarrely and almost inexplicably, though, these characters seem more real than most, and I've cared deeply about them from *Wizards First Rule* and *Stone of Tears* all the way through this concluding novel (ignoring, for the moment, that Nicc's adventures continue in a spin-off series). Somehow, these characters make it worth returning time and again to Goodkind's frustrating writing and this world that really sticks with me. I was pulled into this series when I watched *Legend of the Seeker* (an extremely underrated show) and wanted to experience the *Sword of Truth* novels. Was it worth it? For me, it was. If someone asked me if I would recommend the series, however, I'd have to say, Only the first two books. As I look back at all the stories, all the declarations of love between Richard and Kahlan, all the preaching about free will, all the straw man arguments, I find it was really the first two novels that had the bulk of the inspiration. I give Goodkind credit for bringing the major characters back for *Warheart*, giving each of them a little something to do, even if it felt like little more than a curtain call for longtime fans to appreciate. There's also a nice little solution to the problem of the half people, though having the newly freed people say a devotion to Lord Rahl feels as wrong as it always has in this series. Goodkind completely tanks the other major conclusions, though, with a horrible cheat. Basically, Richard had known and done things that were not shared with the other characters or the reader until the very end. It was particularly poorly handled because Sulachan and Hannis Arc were barely characters in this book. (Imagine *Star Wars* if Darth Vader only appeared in one or two scenes toward the very end.) Sure, they were mentioned a number of times, but merely as McGuffins, not really as vital villains. Of particular note, I mostly just wish the main characters would have behaved a bit more like adults and that they would have trusted each other more. It seems no one can ever have an idea or express a logical notion without one of the other characters complaining and trying to argue the other side, even though Richard is always right, every time, about everything. After all these books, it would have been nice for the other characters, who he has saved over and over again, to just give him the benefit of the doubt. Because of their constant complaints, it almost makes sense for him to have the extraordinary hypocrisy of lying to them about what he did while in the underworld. Yes, hinging the major conclusion on Richard's lack of truthfulness with his friends is quite a bold, and bone-headed, choice. Thus begins the Golden Age. I could gripe about Goodkind's writing, his philosophical shortcomings, and all the rest for a long time, but I want to end this review on a positive note by stating what I'll always remember about this series: The genuine love of the characters. There is romantic love, familial love, and the love of friends. There is the love of life and the love of freedom. I find I care for these people because they care for each other. They have faults. They have contradictions and exist in a world in which balance is key. Despite everything, this series made me care about the characters and their world. It made me feel and made me think, even if I didn't think in the way the author would have preferred. When I think of the *Sword of Truth*, I'll think of these characters who lived, loved, and fought for what's right.
